EUROPEAN PRODUCT DESIGN AWARD

blinde™

TIMELESS, AUTHENTIC,  
ADAPTABLE, TRANSEASONAL  
- BLINDE IS A VERSATILE  
CONCRETE FURNITURE  
RANGE THAT COMBINES SLICK  
SILHOUETTES WITH LIGHTWEIGHT  
CUSTOM CONSTRUCTION. OUR  
COLLECTION OF FUNCTIONAL  
AND STATEMENT PIECES RANGE  
FROM TABLES TO PLANT POTS,  
AND ALSO COLLABORATES  
WITH ORIGINAL DESIGN AND  
EQUIPMENT MANUFACTURERS  
TO PRODUCE BESPOKE PIECES.

# FLUID™ CONCRETE TECHNOLOGY

CONCRETE IS A COVETED MATERIAL IN THE BUILDING AND DESIGN INDUSTRIES DUE TO ITS DURABLE COMPOSITION, NATURAL APPEARANCE AND SIMPLE CONSTRUCTION. HOWEVER, WHEN IT COMES TO CREATING BEAUTIFUL, LONG-LASTING FINISHES FOR FUNCTIONAL CONCRETE SURFACES, THERE'S MORE THAN MEETS THE EYE.

From sourcing quality ingredients and mixing raw materials through to polishing and packaging, our Fluid™ Concrete Technology delivers a streamlined yet sophisticated system that produces exceptionally robust, handcrafted products.

Our manufacturing facility prides itself on delivering a professional service that is focused on best practice procedures, incorporates multiple quality control touch points, and is executed with an environmentally friendly mindset.

## Colours

### Natural

Our most versatile shade, Natural is an organic concrete finish that seamlessly integrates into contemporary or traditional spaces.

### Graphite

Sleek and modern, Graphite demands attention. Familiar yet fresh, Graphite complements a range of alfresco spaces.

### Bone

A trendsetting finish with a clean and crisp texture. Bone is inspired by coastal tones and peaceful spaces.

## The Concrete

Fluid™ Concrete Technology uses a custom composition of green cement combined with 95% recycled natural materials.

Our special moulding process incorporates multiple layers of structural meshing combined with a carefully mixed slurry to produce a high-quality and dimensionally stable concrete that is relatively lightweight and incredibly strong.

With a curing process that allows each piece to rest and set in controlled conditions, we are able to produce consistently beautiful products that are built to last.

## The Coating

Developed in-house by our research and development team and a highly experienced German coating supplier, Fluid™ products are coated with a water-resistant barrier to ensure the green concrete composite shell becomes totally inert and isn't subject to temperature fluctuations or moisture saturation.

Each product is fully enveloped in a specially formulated solvent-based solution that protects the raw materials from environmental weathering. This enables us to deliver perfection from the base raw materials right through to the finished product - working from the inside out, to achieve an exceptionally robust product that is purpose built.

### Eco-friendly

Made from a combination of green cement and 95% recycled natural materials that absorb CO2 during the curing process, our composites are 100% recyclable and release minimal greenhouse gas emissions.

### Quality Control

Every piece is marked with a unique serial number for quality control and traceability purposes. They're also dimensionally stable with low expansion and contraction rates.

### Stain Resistant

Rigorous testing confirms the surface is impervious to ethanol, wine, vinegar, oil, mustard, tomato ketchup, salt, soy, bleach, espresso coffee, window cleaner, and more. (Turmeric should be avoided.)

### Environment Resistant

Fluid™ concrete is resistant to water, fire, insects, termites, mold and mildew. Fully cured, non-hydraulic concrete does not retain water, meaning it is resistant to freezing and thawing.

### Lightweight

Sturdy yet lightweight composition creates easily relocated furniture solutions.

### Seamless Construction

We generate and work with moulds capable of producing unibody products which are seamless and free from join lines.

### Durable Surface

An exceptionally strong adhesion creates a coating that does not flake, peel or crack, and can withstand extreme weather variations and long UV exposure.

### UV Resistant

Even when our products were exposed for 144 hours in 12-hour cycles to water spray, UV rays, and water condensation, colours retained their depth and luster.
